**Game preparation:**

The player of this game requires to install one of the local servers to play this game, the recommended local server is XAMPP, here is the download link of it.
https://www.apachefriends.org/index.html

In the panel of XAMPP, Apache and MySQL should be activated as in the image below.

The folder of the game "TanksAdventure" should be placed in the path of "xampp / htdocs"

Then use a web browser such as Google Chrome or FireFox to open a webpage, then copy the link below into your URL of the web browser.
localhost/TanksAdventure/index.html

The default host name is "localhost"
The default username is "root"
The default password is ""

Users could change them in the records.php on lines 108 to 111.

The PHP webpage will automatically create a database called tank_adventure, it will also create a database table "players". After the game is finished, the player could type a nickname into the box the add their nickname, difficulty and score into the database. The records table could be edited in the following link
localhost/phpmyadmin/index.php

Server: 127.0.0.1 » Database: tank_adventure » Table: players
